Services

- Exports and Imports customs clearance.
- Door to Door
- Inland trucking + Connecting Sea
- Consolidation
- Sea CFS warehouse services, including VAS
- Tracking and DSR updates

Sea Freight

Booking Platform *by* BetterU

We have our in-house sea freight booking platform, which allows users to book directly with carriers. One of our group companies, BetterU Supply Chain (Shanghai) Co., Ltd., operates this platform under the same leadership as Titan Supply Chain (Shanghai) Co., Ltd.

Becoming a registered booking agent is a straightforward process. It does not require BCO or NAC contracts; it only requires a deposit contract with carriers. BetterU has made the required deposits to a few carriers, and the carrier allows BetterU to book directly without any further contractual obligations.

As we are a booking agent, many other forwards place carrier bookings through the BetterU platform, which leads to one of our core businesses.

BetterU can book directly with all the carriers listed below.

Air Freight

Annual Volume

- Air Exports 1,200,000kgs
- Air Imports 60,000kgs

Services

- Exports and Imports customs clearance.
- Door to Door

Titan's first project cargo (Importing an Aircraft CRJ-550 from Germany to China), pictures of departure from Germany.

Achievements

TITAN SUPPLY CHAIN (SHANGHAI) CO., LTD

INTRODUCING THE FIRST EVER TRANSHIPMENT VIA HGH AIR-AIR TRANSHIPMENT FROM DAC TO SFO VIA CHINA

One of our ventures into the 'bonded logistics center international transit cargo' business has been a resounding success! It was the first-ever transshipment operated via "Hangzhou Xiaoshan International Airport."

This milestone is a testament to the strong partnership between "Titan Supply Chain (Shanghai) Co., Ltd." and "Expo Freight Limited.", which jointly initiated this successful venture with its other partners and valued customers.

Recently, a shipment of 46,000 kilos / 260 cubic meters fully chartered from DAC (Dhaka) to HGH (Hangzhou) and processed transfer from HGH (Hangzhou) to NGB (Ningbo) under bonded transportation including bonded customs procedures and terminal operations, which has been finally and successfully airlifted from NGB (Ningbo) airport to SFO (San Francisco) airport.

Since January 1, 2024, the supervision method of "International Transit Cargo in Bonded Logistics Centers" added by the General Administration of Customs has become effective. "Bonded Logistics Center International Transit" is referred to as "Center International Transit," and customs supervision code "6073" applies to the center of enterprises in the bonded logistics center to carry out international transit transportation business. The cargo that can be transported to the bonded logistics center from overseas and the whole process of being transported from the bonded logistics center overseas can be determined.

The development of this business is a game-changer. It effectively revitalizes freight route resources and significantly reduces the cost of logistics.

The development of the first business of 'International Transit Goods in Bonded Logistics Center of Airport Economic Demonstration Zone in Hangzhou' is a significant step towards the high-level construction of a robust civil aviation province in Zhejiang Province, and a practical move to promote the integrated development of 'regional and port integration'.

Multimodal Transportation

We offer multimodal transshipment options through China, connecting various Southeast Asian countries to the US, EU, and RU.

Our services include combinations of AIR + SEA/RAIL/LAND or SEA + AIR/RAIL/LAND transportation.

The transshipment operation typically takes 3 to 5 business days from various gateways in China.

- AIR + SEA and SEA + SEA, as well as AIR + AIR services from Sri Lanka and Bangladesh to the USA and Russia via China, provide end-to-end solutions.
- SEA + SEA services from Japan, Thailand, and Korea to Russia via China offer comprehensive end-to-end service.
- SEA + SEA operations from Indonesia to Pakistan via China ensure a complete end-to-end service.
- SEA + SEA MCC operations from Vietnam, Cambodia to Russia via China also provide end-to-end service.
